Computational Analysis of Terrorist Groups: Lashkar-e-Taiba V.S. Subrahmanian, Aaron Mannes, Amy Sliva, Jana Shakarian, John P. Dickerson

Computational Analysis of Terrorist Groups: Lashkar-e-Taiba provides an in-depth look at Web intelligence, and how advanced mathematics and modern computing technology can influence the insights we have on terrorist groups. This book primarily focuses on one famous terrorist group known as Lashkar-e-Taiba (or LeT), and how it operates. After 10 years of counter Al Qaeda operations, LeT is considered by many in the counter-terrorism community to be an even greater threat to the US and world peace than Al Qaeda.

Computational Analysis of Terrorist Groups: Lashkar-e-Taiba is the first book that demonstrates how to use modern computational analysis techniques including methods for “big data” analysis. This book presents how to quantify both the environment in which LeT operate, and the actions it took over a 20-year period, and represent it as a relational database table. This table is then mined using sophisticated data mining algorithms in order to gain detailed, mathematical, computational and statistical insights into LeT and its operations. This book also provides a detailed history of Lashkar-e-Taiba based on extensive analysis conducted by using open source information and public statements. Each chapter includes a case study, as well as a slide describing the key results which are available on the authors’ web sites.

Computational Analysis of Terrorist Groups: Lashkar-e-Taiba is designed for a professional market composed of government or military workers, researchers and computer scientists working in the web intelligence field. Advanced-level students in computer science will also find this valuable as a reference book.

From reader reviews:

Harry Crawford:

This Computational Analysis of Terrorist Groups: Lashkar-e-Taiba book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book will be information inside this guide incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. This specific Computational Analysis of Terrorist Groups: Lashkar-e-Taiba without we understand teach the one who looking at it become critical in thinking and analyzing. Don't always be worry Computational Analysis of Terrorist Groups: Lashkar-e-Taiba can bring any time you are and not make your carrier space or bookshelves' turn out to be full because you can have it within your lovely laptop even cellphone. This Computational Analysis of Terrorist Groups: Lashkar-e-Taiba having good arrangement in word along with layout, so you will not sense uninterested in reading.

Richard Swisher:

The event that you get from Computational Analysis of Terrorist Groups: Lashkar-e-Taiba is the more deep you searching the information that hide into the words the more you get serious about reading it. It does not mean that this book is hard to be aware of but Computational Analysis of Terrorist Groups: Lashkar-e-Taiba giving you buzz feeling of reading. The article writer conveys their point in a number of way that can be understood simply by anyone who read this because the author of this book is well-known enough. This kind of book also makes your vocabulary increase well. Therefore it is easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having that Computational Analysis of Terrorist Groups: Lashkar-e-Taiba instantly.

Otis Key:

Your reading sixth sense will not betray a person, why because this Computational Analysis of Terrorist Groups: Lashkar-e-Taiba reserve written by well-known writer who knows well how to make book which might be understand by anyone who also read the book. Written throughout good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still doubt Computational Analysis of Terrorist Groups: Lashkar-e-Taiba as good book but not only by the cover but also with the content. This is one reserve that can break don't evaluate book by its deal with, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your looking at sixth sense already alerted you so why you have to listening to one more sixth sense.

Marilyn Calhoun:

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the teacher want, like asked to the library. They go to there but nothing reading significantly. Any students feel that looking at is not important, boring as well as can't see colorful pics on

there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Computational Analysis of Terrorist Groups: Lashkar-e-Taiba can make you experience more interested to read.
