Discovering Mathematics with Magma: 19 (Algorithms and Computation in Mathematics) Wieb Bosma, John Cannon

This volume celebrates the Computer Algebra system Magma. With a design based on the ontology and semantics of algebra, Magma enables users to rapidly formulate and perform calculations in the more abstract parts of mathematics. This book introduces the reader to the role Magma plays in advanced mathematical research through 14 case studies which, in most cases, describe computations underpinning new theoretical results. The authors were chosen both for their expertise in the particular field and for their innovative use of Magma. Although by no means exhaustive, the topics range from number theory and algebraic geometry, via representation theory and group theory to some branches of discrete mathematics and graph theory. A basic introduction to the Magma language is given in an appendix. The book is simultaneously an invitation to learn a new programming language in the context of contemporary research problems, and an exposition of the types of problem that can be investigated using computational algebra.

From reader reviews:

David Simpson:

Reading a e-book can be one of a lot of exercise that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new information. When you read a guide you will get new information because book is one of various ways to share the information or their idea. Second, examining a book will make you more imaginative. When you examining a book especially fictional book the author will bring one to imagine the story how the personas do it anything. Third, you may share your knowledge to some others. When you read this Discovering Mathematics with Magma: 19 (Algorithms and Computation in Mathematics), you can tells your family, friends in addition to soon about yours publication. Your knowledge can inspire the others, make them reading a reserve.

Christine Scott:

Precisely why? Because this Discovering Mathematics with Magma: 19 (Algorithms and Computation in Mathematics) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will surprise you with the secret this inside. Reading this book next to it was fantastic author who also write the book in such incredible way makes the content inside easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of rewards than the other book get such as help improving your ability and your critical thinking approach. So , still want to postpone having that book? If I were being you I will go to the guide store hurriedly.

Thomas Carlson:

Are you kind of busy person, only have 10 or 15 minute in your day to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are receiving problem with the book when compared with can satisfy your limited time to read it because all of this time you only find e-book that need more time to be study. Discovering Mathematics with Magma: 19 (Algorithms and Computation in Mathematics) can be your answer mainly because it can be read by a person who have those short spare time problems.

Aurelio Ashley:

You will get this Discovering Mathematics with Magma: 19 (Algorithms and Computation in Mathematics) by visit the bookstore or Mall. Just simply viewing or reviewing it could to be your solve issue if you get difficulties to your knowledge. Kinds of this book are various. Not only by written or printed but additionally can you enjoy this book by e-book. In the modern era similar to now, you just looking by your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose right ways for you.
