RUSSELL AND THE LINGUISTIC PHILOSOPHY It is generally acknowledged that Bertrand Russell played a vital role in the so-called "revolution" that has taken place in twentieth century Anglo-American philosophy, the revolution that has led many philosophers virtually to equate philosophy with some variety - or varieties - of linguistic analysis. His contributions to this revolution were two fold: (1) together with G. E. Moore he led the successful revolt against the neo-Hegelianism of Idealists such as Bradley and McTaggart; (2) again with Moore he provided much of the impetus for a somewhat revolutionary way of doing philosophy. (1) and (2) are, of course, closely related, since the new way of philosophizing could be said to constitute, in large part, the revolt against Idealism. Be this as it may, however, the important fact for present consideration is that Russell was a major influence in turning Anglo-American philosophy in the direction it has subsequently taken - toward what may be termed, quite generally, the "linguistic philosophy." Unfortunately, though his importance as a precursor of the linguistic philosophy is well-known, the precise sense in which Russell himself can be considered a "philosopher of language" has not, to the present time, been sufficiently clarified. Useful beginnings have been made toward an investigation of this question, but they have been, withal, only beginnings, and nothing like an adequate picture of Russell's overall philosophy of language is presently available.
