Exercises in Programming Style Cristina Videira Lopes

Using a simple computational task (term frequency) to illustrate different programming styles, **Exercises in Programming Style** helps readers understand the various ways of writing programs and designing systems. It is designed to be used in conjunction with code provided on an online repository. The book complements and explains the raw code in a way that is accessible to anyone who regularly practices the art of programming. The book can also be used in advanced programming courses in computer science and software engineering programs.

The book contains 33 different styles for writing the term frequency task. The styles are grouped into nine categories: historical, basic, function composition, objects and object interactions, reflection and metaprogramming, adversity, data-centric, concurrency, and interactivity. The author verbalizes the constraints in each style and explains the example programs. Each chapter first presents the constraints of the style, next shows an example program, and then gives a detailed explanation of the code. Most chapters also have sections focusing on the use of the style in systems design as well as sections describing the historical context in which the programming style emerged.

From reader reviews:

Lois Yale:

As people who live in the actual modest era should be up-date about what going on or info even knowledge to make these people keep up with the era that is always change and advance. Some of you maybe can update themselves by reading through books. It is a good choice in your case but the problems coming to an individual is you don't know what one you should start with. This Exercises in Programming Style is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Louis Hudson:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, after that why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Exercises in Programming Style, you may enjoy both. It is very good combination right, you still would like to miss it? What kind of hangout type is it? Oh come on its mind hangout men. What? Still don't understand it, oh come on its identified as reading friends.

Eddie Patten:

As we know that book is significant thing to add our know-how for everything. By a reserve we can know everything we really wish for. A book is a pair of written, printed, illustrated or even blank sheet. Every year has been exactly added. This e-book Exercises in Programming Style was filled concerning science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading a book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you just wanted.

Shari Villa:

That guide can make you to feel relax. This specific book Exercises in Programming Style was colourful and of course has pictures on the website. As we know that book Exercises in Programming Style has many kinds or type. Start from kids until teens. For example Naruto or Detective Conan you can read and think that you are the character on there. Therefore not at all of book usually are make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
