Philip's Guide to Minerals, Rocks and Fossils

A.R. Woolley, A.C. Bishop, William Roger Hamilton

Philip's Guide to Minerals, Rocks and Fossils A.R. Woolley, A.C. Bishop, William Roger Hamilton

A practical and authoritative guide to identifying minerals, rocks and fossils. An invaluable handbook for amateur collectors and specialists alike, small and compact enough to carry in the pocket or rucksack. The illustrations in this revised edition have been improved to give a truer representation of the colours found in nature. A best-seller in its field since 1974 when it was first published, the 1998 edition has been completely revised and updated, with brand-new, extended introductory sections and appendices. The book has also been completely redesigned to bring it into the 1990s and make it more user friendly. Around 145 colour plates show typical mineral, rock and fossils specimens. The plates were photographed from the Natural History Museum's incredible collection. Over 100 specially commissioned line drawings illustrate the authoritative descriptions of the specimens. The 1998 edition has been updated and revised by two of the original authors (Dr Woolley and Dr Bishop), plus an expert in fossils, all from the world-class Natural History Museum in London. Barbara Folsom:

In this particular era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become considered one of it? It is just simple strategy to have that. What you should do is just spending your time not much but quite enough to have a look at some books. One of the books in the top list in your reading list will be Philip's Guide to Minerals, Rocks and Fossils. This book and that is qualified as The Hungry Mountains can get you closer in growing to be precious person. By looking right up and review this publication you can get many advantages.

Jose Said:

As a pupil exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's internal or real their hobby. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Philip's Guide to Minerals, Rocks and Fossils can make you sense more interested to read.
