Creating Brain-friendly Classrooms: Practical Instructional Strategies for Education Lowell Biller

Educators have an incredible opportunity to influence the development of neural pathways within the brain of each student. Biller's guide to brain-friendly learning promotes an understanding of how the neuroscience discoveries of the past decade can be applied in today's classrooms. His four-step process called I-CAN, an acronym for: **I**nstructional climate, **C**erebral engagement, **A**bundant connections and **N**eural practice, provides instructional tools and strategies that are aligned with the way the brain naturally learns and will aid in effective teaching and discipline. This book bridges the gap between neurological research and classroom application. Intended for K-12 educators, this work will be of interest to parents and others looking for insight into how the brain receives, processes, and stores information.
