Handbook of Odors in Plastic Materials

George Wypych

Handbook of Odors in Plastic Materials George Wypych

Several reasons are behind formation of odors in materials, including the following:

- Use of other materials than polymer, especially materials required in processing
- Use of various process parameters and their severity in degradation of components of formulation
- Recycling of polymeric materials
- Contact with natural products (food, cosmetics, etc.)
- Storage
 1. Migration-evaporation
 2. Storage in the same space
 3. Diffusion-related properties

The above reasons are analyzed for different materials to find out the best methods to prevent odor formation. The book also contains information on testing of odor changes, relationship between odor and toxicity, and the selection of raw materials for fog-free products. The first book in this field, the *Handbook of Odors in Materials* is needed by anyone interested in materials.

- The first book of its kind in this field
- Analyzes the reasons behind odor formation and provides the best methods to prevent odors in various materials
- Contains information on testing of odor changes and the relationship between odor and toxicity
