Annual Plant Reviews, Plant Polysaccharides: Biosynthesis and Bioengineering: Volume 41 Peter Ulvskov

Plant Polysaccharides, an exceptional new volume in Wiley-Blackwell's successful Annual Plant Reviews series, covers the polysaccharides and proteins that form the fundamental architecture of the plant cell wall, and the genes that encode the cellular machinery that synthesizes them.

The volume focuses on the evolution of the many families of genes whose products are required to make a particular kind of polysaccharide, bringing attention to the specific biochemical properties of the proteins to the level of kinds of sugar linkages they make.

Beautifully illustrated in full colour throughout, this exceptional new volume provides cutting edge up-to-date information on such important topics as cell wall biology, composition and biosynthesis, glycosyltransferases, hydroxyproline-rich glycoproteins, enzymatic modification of plant cell wall polysaccharides, glycan engineering in transgenic plants, and polysaccharide nanobiotechnology.

Drawing together some of the world's leading experts in these areas, the editor, Peter Ulvskov, has provided a landmark volume that is essential reading for plant and crop scientists, biochemists, molecular biologists and geneticists. All libraries in universities and research establishments

where plant sciences, agriculture, biological, biochemical and molecular sciences are studied and taught should have copies of this important volume.

From reader reviews:

Paul Kline:

Book is to be different for every grade. Book for children until adult are different content. As you may know that book is very important for all of us. The book Annual Plant Reviews, Plant Polysaccharides: Biosynthesis and Bioengineering: Volume 41 seemed to be making you to know about other information and of course you can take more information. It is very advantages for you. The e-book Annual Plant Reviews, Plant Polysaccharides: Biosynthesis and Bioengineering: Volume 41 is not only giving you more new information but also for being your friend when you really feel bored. You can spend your personal spend time to read your publication. Try to make relationship while using book Annual Plant Reviews, Plant Polysaccharides: Biosynthesis and Bioengineering: Volume 41. You never feel lose out for everything in the event you read some books.

Barry Houde:

Nowadays reading books are more than want or need but also get a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book which improve your knowledge and information.
