Negotiating Climate Change Amanda Machin

Climate change is the greatest challenge of the age and yet fierce disagreement still exists over the best way to tackle the problem or, indeed, about whether it should be tackled at all. In this original book, Amanda Machin draws on radical democratic theory to show that such disagreement does not have to hinder collective action; rather, democratic differences are necessary if we are to have any hope of acting against climate change. This is an important read for researchers, students, policy makers and anyone concerned about the current (lack of) politics of climate change.
