Dementia: Molecules, Methods and Measures I. Hindmarch, H. Hippus, G. K. Wilcock

Dementia is generally assumed to afflict, in some form, about 10% of the population over 65. However, very little is known about its causes or its cure. Presents a reasoned argument for the development of potential molecules, methods and measures for a therapeutic approach to dementia. This argument is made in the awareness of the uncertainties and of the debates about the conditions and aims of treatment both in the clinic and in the community.
