Research Design in Urban Planning: A Student's Guide

Stuart Farthing

Research Design in Urban Planning: A Student's Guide Stuart Farthing

"This excellent book fills a significant gap in the literature supporting planning education by providing clear, succinct advice on the design and implementation of small-scale student research projects."

- *Chris Couch, Professor of Geography and Planning, University of Liverpool*

"A perfect text for supervisors to give students so that they plan their research projects carefully rather than leap headlong into data collection."

- *Jean Hillier, Emeritus Professor of Sustainability and Urban Planning, RMIT University, Melbourne*

"Highly recommended... Ranging across topics such as planning a research programme and data management and the handling of ethical issues, the book will be very helpful to those embarking on a thesis or dissertation in the field."

- *Peter Fidler, President of the University of Sunderland*

Research Design in Urban Planning: A Student's Guide is a brilliantly accessible guide to designing research for that all-important dissertation. Aimed at both undergraduate and postgraduate levels, this text will:

- discuss research design, outlining the stages of the research process in clear detail and the key decisions which need to be taken at each stage
- explain to students how to re-interpret policy issues as researchable questions, appropriate for investigation
- look in detail at how researchers make their choice of methods, helping students to justify their own decisions

· reveal the ethical dimension to such decisions in the context of a growing requirement for the ethical approval of student projects

· review the issues for comparative studies – important not least because of student involvement in Erasmus programs and AESOP workshops

Packed with case studies, exercises, illustrations and summaries, **Research Design in Urban Planning** is an invaluable resource for students undertaking their first substantial, individual investigations.
