Video Mining (The International Series in Video Computing)

Video Mining (The International Series in Video Computing)

Video Mining (The International Series in Video Computing)
Traditionally, scientific fields have defined boundaries, and scientists work on research problems within those boundaries. However, from time to time those boundaries get shifted or blurred to evolve new fields. For instance, the original goal of computer vision was to understand a single image of a scene, by identifying objects, their structure, and spatial arrangements. This has been referred to as image understanding. Recently, computer vision has gradually been making the transition away from understanding single images to analyzing image sequences, or video Video understanding deals with understanding of video understanding. sequences, e.g., recognition of gestures, activities, facial expressions, etc. The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion-based recognition of actions and events. Video understanding has overlapping research problems with other fields, therefore blurring the fixed boundaries. Computer graphics, image processing, and video databases have obvi ous overlap with computer vision. The main goal of computer graphics is to generate and animate realistic looking images, and videos. Re searchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery. A good exam pIe of this is image-based rendering and modeling techniques, in which geometry, appearance, and lighting is derived from real images using computer vision techniques. Here the shift is from synthesis to analy sis followed by synthesis. Image processing has always overlapped with computer vision because they both inherently work directly with images.

From reader reviews:

Louie Thompson:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each e-book has different aim or goal; it means that publication has different type. Some people experience enjoy to spend their a chance to read a book. They can be reading whatever they take because their hobby is reading a book. Think about the person who don't like examining a book? Sometime, person feel need book if they found difficult problem or exercise. Well, probably you will want this Video Mining (The International Series in Video Computing).

Sheilah Harvey:

The book Video Mining (The International Series in Video Computing) can give more knowledge and information about everything you want. Why must we leave the best thing like a book Video Mining (The International Series in Video Computing)? Several of you have a different opinion about e-book. But one aim this book can give many details for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or data that you take for that, you could give for each other; you are able to share all of these. Book Video Mining (The International Series in Video Computing) has simple shape but the truth is know: it has great and big function for you. You can appearance the enormous world by available and read a book. So it is very wonderful.

Margaret Head:

The actual book Video Mining (The International Series in Video Computing) has a lot associated with on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. Mcdougal makes some research prior to write this book. This book very easy to read you can get the point easily after looking over this book.

James Jones:

Many people spending their time frame by playing outside with friends, fun activity having family or just watching TV the entire day. You can have new activity to enjoy your whole day by reading through a book. Ugh, you think reading a book will surely hard because you have to accept the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Cell phone. Like Video Mining (The International Series in Video Computing) which is finding the e-book version. So , why not try out this book? Let's see.
