This is a book of caselets for the Fixed Income Securities market. It makes heavy use of Bloomberg as a tool for the course. It also is keyed directly with all of the existing Fixed Income titles that are currently in use for the course. The authors use a framework for all of the cases that puts the student in the position of being an "intern" for the Managing Director for the Fixed Income Department of a large prestigious firm. This framework is great for addressing all of the key topics and tools that are key to students understanding all about Fixed Income Securities. Tying each of the caselets to specific topics and chapters in the existing texts for the course and identifying key Bloomberg functions that will be used with each caselet make assignment by instructors very easy.
