Design in Nature: Learning from Trees Claus Mattheck

The chicken bone you nibbled yesterday and threw away was a high-tech product! Not only that: it was a superlative light-weight design, functionally adapted to its mechanical requirements. No engineer in the world has, as yet, been able to copy this structural member, which is excellently optimized in its external shape and its internal architecture as regards minimum weight and maximum strength. The tree stem on which you recently carved your initials has also, by life-long care for its body, steadily improved its internal and external structure and adapted optimally to new loads. In the course of its biomechanical self-optimization it will heal up the notch you cut as speedily as possible, in order to repair even the smallest weak point, which might otherwise cost it its life in the next storm. This book is dedicated to the understanding of this biomechanical optimization of shape. It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self-optimization (adaptive growth) and to simulate it by computer. The method newly developed for this purpose was called CAO (Computer-Aided Optimization). With this method, it is possible to predict the growth of trees, bones and other biological structures from the tiger's claw to the sea urchin's skeleton.

From reader reviews:

Jason Nunez:

Nowadays reading books become more than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The info you get based on what kind of e-book you read, if you want have more knowledge just go with training books but if you want really feel happy read one with theme for entertaining including comic or novel. Typically the Design in Nature: Learning from Trees is kind of e-book which is giving the reader unforeseen experience.

Peter Zimmerman:

The reserve with title Design in Nature: Learning from Trees has a lot of information that you can understand it. You can get a lot of benefit after read this book. This specific book exist new information the information that exist in this publication represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book with your smart phone, so you can read that anywhere you want.

Eileen Moore:

Typically the book Design in Nature: Learning from Trees has a lot details on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. The author makes some research ahead of write this book. This kind of book very easy to read you can get the point easily after reading this article book.

Shawn Mathison:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the professor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Design in Nature: Learning from Trees can make you feel more interested to read.
