## Take Control of Sharing Files in Snow Leopard Glenn Fleishman

This detail-packed book makes file sharing easy, whether it's between two Macs on a local network, among a mixed-platform office workgroup, or between far-flung computers on the Internet. You'll get help with **selecting and configuring the right hardware and software** for your needs and budget, learn about the **pros and cons of different file-sharing options**, find specific steps for setting up each major option (with special instructions to help you avoid problems and security risks), and learn **how to connect to file servers** from a variety of major operating systems.

Read this book to learn the answers to questions like:

- Which technique should I use to share my files?
- How do I set up my Mac as a file server?
- What types of security should I set up? Do I need a firewall?
- Should I use Samba or AFP as my file-sharing service?
- How can I restrict what users can do after they log in?
- How can my Windows-using colleagues access my shared files?
- How do I share iPhoto photos? What about songs from iTunes?
- What's the best way to connect to a file server from my Mac?
- What are my security options for running an FTP server?
- How can I configure my server so it wakes up if someone wants to use it?
