Green Growth and Sustainable Development: 14 (Dynamic Modeling and Econometrics in Economics and Finance)

Green Growth and Sustainable Development: 14 (Dynamic Modeling and Econometrics in Economics and Finance)

The book examines problems associated with green growth and sustainable development on the basis of recent contributions in economics, natural sciences and applied mathematics, especially optimal control theory. Its main topics include pollution, biodiversity, exhaustible resources and climate change. The integrating framework of the book is dynamic systems theory which offers a common basis for multidisciplinary research and mathematical tools for solving complicated models, leading to new insights in environmental issues. ?
