## **FACES: Photography and the Art of Portraiture** Paul Fuqua, Steven Biver

There is so much detail to be captured in a face. Cicero (106-43 BC) said: "The face is a picture of the mind as the eyes are its interpreter." To capture a person's personality, there are many things to keep in mind, and the authors of *FACES* show us how to match up a personality with lighting, posing, and composition. Portraiture is truly an art, and this book dives deep into the details so that you end up with a gorgeous portrait that both you and your subject love.

Not only is this book the most comprehensive title available on portraiture, but it contains stunning images. Each image is paired with a lighting diagram, a description of why the type of image was chosen, and then takes you through postproduction to put the finishing touches on. The authors also showcase a gallery of portraits by renowned photographers.
